Personal Statement

With over a decade of experience across fintech, e-commerce, and consumer apps, I've developed a passion for simplifying complex experiences. My approach combines thoughtful design, user research, and experimentation to create intuitive products that solve real problems and drive measurable business growth.

Skills

Product Design, Product Strategy, User Research, Design Systems, Rapid Prototyping, Interaction Design, Usability Testing, Collaboration, Mentorship

Tools

Figma, Miro, Claude, Cursor, Codex, Grok, Antigravity, UserTesting, Loom, Hotjar, Mixpanel

Experience

Senior Product Designer, **Independent Contract** | 2025 - Present

I work with startups on short-term engagements to define priorities, explore concepts, and turn early ideas into intuitive products. Adapting to different teams, business goals, and technical constraints, I contribute to projects from early strategy through launch.

Senior Product Designer, **North One** | 2023 - 2025

Collaborated cross-functionally to improve North One's core banking features and growth channels. A major focus was leading ongoing optimizations to the sign up flow, using research, analytics, and experimentation to increase conversions by over 18%.

Senior Product Designer, **SoleSavy** | 2021 - 2023

As the first product hire and sole designer for most of my time there, I established the design system and led design across all SoleSavy platforms. My highlight was launching the Collect marketplace publicly and boosting membership upgrade conversions by over 31%.

Senior Designer, **Lift Interactive** | 2015 - 2021

Led design and strategy across a range of projects, working from early discovery through development and launch. My responsibilities ranged from managing entire projects to collaborating with larger teams, mentoring designers, and improving internal processes.

Education

Macewan University | 2012 - 2015

Digital Design Studies
